PLANT OF THE READING KNOB WORKS, READING, PENNSYLVANIA

Introduction

THE READING KNOB WORKS is now in a position to supply the long recognized and steadily growing demand for Builders' Hardware, of a more individual character than heretofore has been offered by any stock manufacturer. . . . The Earle Hardware Manufacturing Company, of Los Angeles, being operated now as a division of the Reading Knob Works, will continue to specialize on Period Hardware, that is expressive of the true craft spirit, and also will maintain its service in the creation of original designs. In addition, through the national distributing organization of the Reading Knob Works, authentic hardware in standardized period types, yet embodying the same careful craftsmanship, will now be offered to a much broader field than it has been possible to serve in the past.

Earle Period Hardware was originated in California fifteen years ago to supply appropriate hardware for homes of early California architecture. As the beauty of these homes grew upon the nation, so did the contribution that Earle Hardware had made to these homes. As a result, Earle Hardware, in every preferred period, is now known and admired by a majority of the important architects and home designers in America, bringing to modern building a personality the world has not known since the forges of the medieval armorers were allowed to cool.

Many items in this line are illustrated and described on the following pages of this catalog.

ALPHABETICAL INDEX

A		F	
	PAGE		PAGE
Adjusters, Casement.....	17, 18	Fasteners, Casement.....	19
Apartment Entrance Door Sets.....	109	Fasteners, Sash.....	33
Auxiliary Springs.....	55	Figures or Numbers.....	29
B		Finishes.....	12
Bar Sash Lifts.....	30	Floor Door Stops.....	24

Number **793** for windows opening in. All others for windows opening out
Packed one-half dozen in a box, with screws. Specify finish

CASEMENT ADJUSTERS

"LOXRITE"

(Patented)

Reversible

One Fixture for Right or Left

THE OPERATION of the Loxrite is a decided departure from all other casement adjusters found on the market today.

It can be installed before or after the completion of the home or building.

Just one hole is necessary through the sill and no special built sash is required.

No openings are left through which drafts can enter, making the Loxrite installation absolutely weatherproof.

Loxrite does not interfere with screens.

Substantially built from solid brass, finished and rustproof. Loxrite has a smooth and positive action, easy of operation, sealing the window and making it air-tight.

Suitable for use on windows having sill 5" or more wide. Packed one in a box, with screws

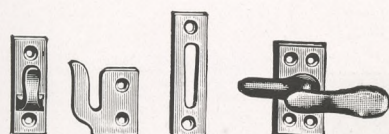

One handle packed with every three adjusters

Specify width of sill

and 2721 3/4 T-W

One pair in a box, complete with screws

Specify finish wanted on shanks and roses

COLORED GLASS DOOR KNOBS

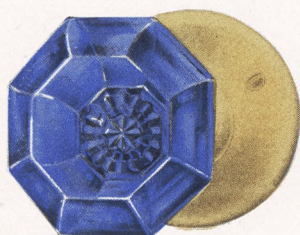

USED on High-Grade Residences, Hotels and Public Buildings, to harmonize with draperies, floor coverings and general color schemes. Metal parts may be had in a variety of finishes to match polychrome lighting fixtures, furniture, etc.

The knobs shown on the following page may be used with any style of trim, and are suitable with plain round roses and oval keyplates in standard finishes.

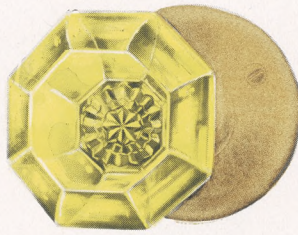

They are especially appropriate with "Ridgewood" design (see page 130), in finishes as DB, DBR, NS, VA, OI, RG and GT (see list of finishes).

Six dozen in a case

Approximate weight 145 lbs.

CYLINDER GUARD LOCK

No. 742

Description

CASE..... $4\frac{3}{4}$ " x $2\frac{3}{4}$ ", Solid Bronze
 BACKSET..... $2\frac{3}{8}$ " for doors $\frac{7}{8}$ " to $2\frac{1}{2}$ ". Right- or left-hand opening in only
 CYLINDER.....Bronze, five-pin tumblers
 KEYS.....3 German Silver
 KEY CHANGES....Practically unlimited

Jimmy-Proof

The Huber cylinder guard lock No. 742 is designed for apartment and store doors, and it binds the door and jamb together, making it impossible to "jimmy" them apart.

Cylinder Guard

The Cylinder is guarded against rotation by the patented Cylinder Guards, and a flush type ring. These cylinder guards prevent the turning of the cylinder with a Stillson wrench, a common method used by gentlemen of the profession.

Safety Throw

The bolt of this lock has a patented "Safety Throw" which prevents "jamming," a common fault of ordinary Dead Locks. It is impossible to place the bolt in any position where the key will not open it.

Number	
742	(Single Cylinder)
742 DC	(Double Cylinder)

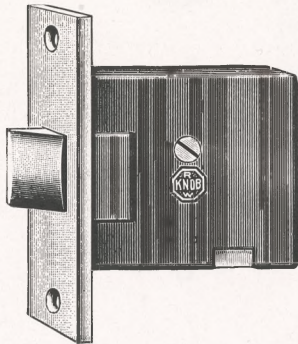

Packed one in a box, complete with screws

Six dozen in a case

Approximate weight 214 lbs.

APARTMENT ENTRANCE DOOR SETS

WITH "JIMMY-PROOF" CYLINDER DEAD LOCK

SET NO. GB 7442

Set consists of—

- 1 Cylinder Dead Lock 742
- 1 Mortise Latch 714
- 1 Escutcheon GB 710½
- 1 Pair Knobs GB 74¼ x 1 Rose P 2

Reversible for right or left hand doors opening in only

Cylinder has five pin tumblers—three keys—changes unlimited

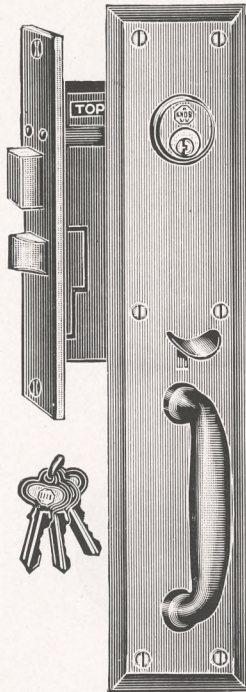

The bolt of this lock has a patented "Safety Throw" which prevents "jamming," a common fault of ordinary Dead Locks. It is impossible to place the bolt in any position where the key will not open it

Packed one set in a box, complete with screws
